

OAI Workshop Panel #1

- **Panel: Standards and Open Source Software: Investigating and Shaping the Relationship**
- **Panelists: Jimmy Ahlberg (Ericsson) - Doug Knisely (Qualcomm) - Tommaso Melodia (NEU) - Ultan Mulligan (ETSI) - Jonne Soininen (Nokia)**
- **Moderator: Raymond Knopp**

Question #1

how can we leverage open source to do a good job for standards?

- where does each have a role?
- How will software will accompany standards in the nextGen?
- OSS can help drive innovation into standards, we saw from Ericsson's presentation this morning. How to formalize this?

Question #2

- **How do you think the relationships between O-RAN, OAI, 3GPP, LFN should evolve on the road to 6G**

Question #3

- **OSS and prototyping - bringing standards into schools**
 - With OAI and its global reach, clearly the ecosystem will benefit from knowledge gained by young people during their studies/research when they transition to industry. how can we work better together to influence the standards through initiatives like this?
